

New Year = New You, Right?

More appropriately = a New Us. I have been allowed to take over the first post of 2016 and have a few exciting projects I have been working on to share. We are working diligently to produce and provide you with new content, new resources, and new opportunities. I would like to personally invite you to review these materials, visit us when/where you can, schedule meetings to discuss your needs/wants, and reach out with your requests. Help us, Help you succeed in 2016!!

New and always improving: www.pati-air.com. Miss a media post? Delete a newsletter email by accident? Need a form? Looking for the latest news? Visit the website to see these things and more.

Inspection World 2016 – Here we come San Diego!! Visit and chat with Greg and Steve in sunny California January 24-26, 2016. We will be in booth # 228. Be sure to visit us for Steve’s inaugural presentation for Prism Analytical Technologies, Inc. on Tuesday the 26th from 4-6pm.

AHR 2016 – Yay for Orlando!! We are splitting the boys from the girls. Alice and I will be sunning it up in Florida for the AHR Conference and Expo. Visit us in booth # 5094 (the back forty - wear your walking shoes). Alice is helping all IAQ professionals with her “Using VOCs: What Do I Do with This Lab Report?” presentation on Monday the 25th at 10 a.m.

Looking for more? You ask – we provide.

Alice Delia, Ph.D., Laboratory Director at Prism Analytical Technologies, Inc., has been featured in the Healthy Indoors Magazine for December 2015. Her article, Evaluating Fire and Smoke Contamination in Indoor Air, can be found on page 17 of the electronic periodical at hi.iaq.net ([December 2015](#)).

***Keep your peepers out for her Fire & Smoke Contamination related article in the February issue of the Restoration and Remediation Magazine (sign up for free at <http://www.randrmagonline.com/>).

About Prism Analytical Technologies, Inc.

Prism Analytical Technologies, Inc. is a leading consultative air testing laboratory in the United States that is devoted to the chemical identification and analysis of contaminants in the air. We are a recognized leader in the development and deployment of ambient air testing methodologies for Fortune 100 and 500 companies, industrial hygienists, and environmental consultants. Prism's science-based technologies and wide range of air testing support help clients solve indoor air quality, process control, industrial, and environmental challenges.
